

American Type Drill Press Vises

- Popularly used in tool rooms and machine shops for small work.
- Adjustable screw has fine pitch and long bearing.
- Rugged cast iron construction.
- Grooved steel jaw for better grip.
- Lead screw has precision cut.

Precision Universal Vises

Precision Universal Vise is a newly developed fixture which is composed of two parts, namely a precision vise and a swivel plate base. With the aid of graduated swivel plate, the vise is capable of revolving 360° in a horizontal plane and 45° in a vertical plane. It is adaptable to precision grinding machine and boring machine and so on, for level and inclined face machining as well as boring at a certain degree of inclination etc.

Hydraulic Power Machine Vises

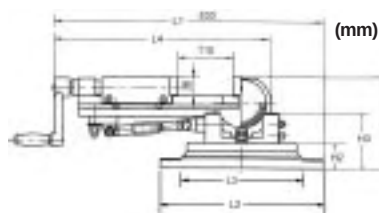

- High precision and rigidity.
- Precision machined.
- The parallelism of two jaws and squareness between Jaws and vise base are within 0.01mm.
- The parallelism of vise base(leading guide to bottom surface) is within 0.01mm.
- Clamping power is much stronger than normal vise.
- The vise body is made of spheroidal cast Iron.
- Three holes one the side of base for clamping range:
